SHIPPING BOOTS, WRAPS
AND BANDAGES
AND ACCESSORIES...
BECOMES A PLEASANT
EXPERIENCE!**

AQUASTAR
EQUESTRIAN LAUNDRY

A winning technology!

Experience and Technology: a legacy of excellence

Since the 1980's **REALSTAR** has been an innovative leader in the manufacturing of dry-cleaning machines for the garment care industry.

Our commitment to research and development has resulted in machines recognized throughout the world for their highest standards of quality control, innovative technology, and compliance with rigid environmental regulations.

In order to satisfy the continuous and growing demand for Laundry Equipment, **REALSTAR** has founded a new division named **AQUASTAR** that can supply a complete series of laundry machines for industrial plants, hospitals, hotels, Laundromats and equestrian centres.

The washing of summer and winter blankets, saddle pads, bell boots, shipping boots, wraps and bandages and accessories... becomes a pleasant experience!

In equestrian centres, farms and stables a lot of time is spent on the care of the horses and consequently the correct treatment and washing of summer and winter blankets, saddle pads and all other accessories becomes an important aspect in granting both the good care of the horses and the health of the riders. Usually after physical effort the saddles pads which are in direct contact with the horse's skin are soaked with the sweat, mixed with dust and impurities from the saddle.

If the saddles pads are not regularly cleaned clumps of dirt may appear that can harden the tissues. The same goes for the summer and winter blankets, which absorb the sweat of the animal, and for the blankets used in the stables or used to protect the horse from the rain.

Sometimes a horse's sweat may develop dermatophytes. To prevent the spread of germs and the proliferation of these fungi it is highly recommended to wash the horse's blankets with great care.

The regular washing of blankets and saddle pads, combined with proper care, allows you to maintain the value and the fine quality of the fabrics and to safeguard the health of the horse..... only careful cleaning is a guarantee of hygiene.

allowing an increase in turnover.

To simplify washing operations our machines can be equipped with payment systems using tokens or coins which render the operator completely independent and autonomous.

Blankets and saddle pads cleaned, perfumed and sanitized!

The excellent results of washing achieved with the **AQUASTAR** system are possible thanks to the use of high quality detergents, softeners and sanitizing products especially developed for the different kinds of fabric used in the production of articles for horse-riding: these allow both careful and delicate washing, perfect for the care of all fabrics.

A simple process for a great result!

Careful market research has brought **AQUASTAR** to achieve a washing system which can be installed in stables with the maximum simplicity, guaranteeing incomparable results and enriching your equestrian centre with a specialized professional service, also

Detergent

Concentrated perfumed liquid detergent for the professional laundry. Suitable for all types of fabrics, whites and colors, effective on dirt even at low temperatures.

Softener

Concentrated perfumed liquid softener for the professional laundry. Suitable for use in the cleaning cycle, it gives the garments an excellent softness.

Sanitizing

Activated concentrate for oxygen bleaching and laundry disinfection of cotton and synthetic textiles.

Industrial High Spin Washer Extractor

Our range of high-spin washer extractors is designed to provide high quality performance and to meet the most demanding requirements while notably reducing water and power consumption.

The savings achieved allow us to guarantee that these appliances will pay for themselves in the medium term.

Our range of high spin washer extractors designed for Equestrian Centres, includes 10, 13 and 18 kg capacity appliances, which can also be equipped with a coin/token slot or prepared for connection to a central payment device.

The stylish new look and cutting-edge technology of these industrial washer extractors combines with the simplicity of their installation. The reduced size does not affect their load capacity. Each washing

machine is equipped with 3 automatic dosing pumps for the dosing of washing detergents, softeners, and sanitizing products and for detergents for delicate textiles.

Professional Dryers

AQUASTAR tumble dryers are the ideal solution for the needs of the laundries in hotels, restaurants, hospitals, retirement homes, industrial facilities, Coin-op laundries and equestrian centres.

In designing the **AQUASTAR** dryers our technical department has paid utmost attention to energy saving, ecology, easy maintenance and of course to operator safety. The reduced dimensions of this tumble dryer make it easy to be transported and installed into already existing laundries.

The **AQUASTAR** dryers ensure excellent results. Available with ELECTRICAL or GAS heating. In this series of dryers the utility

costs are reduced due to the special heated-air directing system.

System of payment with Tokens, Coins or Central Payment unit

The machines are equipped with payment systems with tokens or coins or can be prepared to be connected to a central payment unit with two controls, especially designed for application in equestrian centres.

Industrial High Spin Washer Extractor

- **ELECTRIC** or **HOT WATER**
- **Simple Programmer**
- **Dedicated washing programs**
- **Electronic frequency inverter for drive motor**
- **Extraction speed from 950 to 1100 rpm**
- **Countdown on display**
- **Drain Valve**
- **Body, basket and drum are in stainless steel**
- **Loading door with safety lock system**
- **Free standing high-spin machine**
- **No need to be fixed on the floor**
- **3 automatic dosing pumps**

Load Capacity	Saddle Pads*	Summer Blankets*	Winter Blankets*
10 Kg	5	2	1
13 Kg	9	3	1
18 Kg	12	4	2

Industrial Tumble Dyers

- **Type of Heating: ELECTRIC** or **GAS**
- **Simply programmer control**
- **Stainless steel basket**
- **3 drying programs**
- **Countdown timer**
- **Easy to clean air filter**
- **Large size loading door**
- **Automatic cool down functions**

Load Capacity	Saddle Pads*	Summer Blankets*	Winter Blankets*
8,5 Kg	5	2	1
10 Kg	7	2	1
14 Kg	10	2 - 3	1
18 Kg	15	3 - 4	2

*For an optimal result we suggest to load the machine at ¾ of the full load capacity
